

TRS-80 MC-10

MICRO COLOR BASIC 1.0 (MICROSOFT) · MC6803 · 4K RAM · MC6847 · 32×16

Micro Color BASIC is a cut-down cousin of Color BASIC — semigraphics only, with no Extended/hi-res in the ROM. The chiclet keyboard has one **SHIFT** (right) and one **CTRL** (left). Third-party **MCX BASIC** adds Extended-style commands.

PROGRAM CONTROL

RUN	Start the program
LIST	LIST 10-50 range
NEW	Erase program
CLEAR n	Reserve string space
CONT	Resume after STOP / BREAK
STOP / END	Halt program
CLS	Clear the screen

BASIC STATEMENTS

PRINT ?	; joins, , zones
PRINT@ p,	Print at screen pos 0-511
INPUT	Prompt & read
LET	Assign (optional)
REM	Comment
GOTO GOSUB	Jump / call; RETURN
ON x GOTO	/ GOSUB a,b,c
FOR..NEXT	FOR I=1 TO 9 STEP 2
IF..THEN	Branch
DATA READ	RESTORE rewinds
DIM	DIM A(20),N\$(5)
POKE a,v	Write byte

FUNCTIONS

ABS SGN INT	magnitude/sign/floor
RND(n)	n>1 int 1..n; 0 = 0..1
PEEK(a) MEM	read byte / free bytes
LEN LEFT\$ RIGHT\$ MID\$	MID\$(A\$,3,2)
STR\$ VAL ASC CHR\$	convert num/char
INKEY\$	Scan keyboard (no wait)
POINT(x,y)	Colour at cell (-1 if text)
VARPTR(v)	Variable address (undocumented)
USR(x)	Call ML routine

TEXT & SEMIGRAPHS

32×16

CLS c	Clear to colour 0-8
PRINT@ p	Text position 0-511
SET(x,y,c)	Light cell: x 0-63, y 0-31
RESET(x,y)	Clear a cell
POINT(x,y)	Read a cell's colour
SOUND t,d	Tone 1-255, duration 1-255

Same MC6847 semigraphics as Color BASIC. No PMODE / hi-res in the stock ROM.

VDG COLOUR SET

CLS / SET 0-8

0 Black	1 Green
2 Yellow	3 Blue
4 Red	5 Buff
6 Cyan	7 Magenta
8 Orange	

The MC-10 shares the Color Computer's nine 6847 colours.

CASSETTE STORAGE

CSAVE "name"	Save BASIC program to tape
CLOAD "name"	Load a program
CLOAD? "name"	Verify tape vs memory
CLOADM "name"	Load ML program (undocumented)
SKIPF "name"	Skip to / past a file

Cassette is the only storage. PRINT#-1 / INPUT#-1 handle tape data files.

KEYBOARD & EDITING

BREAK	Stop a running program
CTRL + A	Backspace (delete one char)
CTRL + Q	Delete the whole line
SHIFT (right)	Only one SHIFT key
CONTROL (left)	Only one CTRL key
CTRL + key	Graphics / control characters
RESET (rear)	Warm restart

MEMORY & POKES

16384 (\$4000)	Start of RAM & text screen
PRINT MEM	Free bytes (~3142 on a 4K MC-10)
POKE/PEEK	Standard byte access
\$0000-\$001F	6803 internal registers
\$0080-\$00FF	6803 internal RAM

The 4K RAM at \$4000 mirrors up at \$6000 due to partial address decoding.

QUICK-FACTS

CPU	Motorola MC6803 @ 0.89 MHz
RAM	4K on-board (to 20K with 16K pack)
ROM	8K — Micro Color BASIC 1.0 (Microsoft, 1982)
Video	MC6847 VDG · 32×16 text · RF out
Sound	1-bit; via the SOUND command
Storage / port	Cassette + bit-banged RS-232
